## October....

### A time to celebrate Public Power and recognize Energy Awareness Month

Peabody Municipal Light Plant is a dependable and trustworthy institution whose local operation continually works to bring low cost, safe, reliable electricity to community homes and businesses. In recognition and in honor of the democratic tradition of community decision making that led to the founding of the Peabody Municipal Light Plant in 1891 we celebrate Public Power and our local control! We are very different from the large, investor owned utilities that service some of our neighboring communities. We make our own decisions. We are a part of the community. We work with our schools and officials to make our community a better place to work and live. We have residential rates that are consistently among the lowest in the state along with one of the most modern, reliable electric distribution systems in the area.

Please join us in our celebration of Public Power and Energy Awareness Month. On Saturday, October 16, 2010 from 9:00 am to 12 noon PMLP will once again offer energy saving light bulbs to our residential customers. The bulbs will be sold in our lobby at 201 Warren Street Ext.

#### The following products will be available at \$1.00 per bulb:

15, 20 and 23 watt, low mercury (1 mg. per bulb) compact fluorescent bulbs  
These CFL's have an expected life of 10,000 hours. The 15 watt replaces a 60 watt bulb, 20 a 75 watt and 23 a 100 watt.

#### 3 way bulbs will be offered at \$3.00 each

#### 23 watt outdoor floodlights at \$4.00 each.

Supplies are limited and a maximum of three (3) CFL's and one 3-way or outdoor floodlight per residential account will be enforced.

Energy conservation specialists will be available to answer any questions you have about energy conservation or the Peabody Municipal Light Plant. Please stop by.....coffee and light refreshments will be served.

**You must present your PMLP bill showing your account number to make a purchase.**
