

# Peabody Municipal Light Plant Service Application

Note that this completed and signed form must be received at least 16 weeks (26 weeks if underground primary is required) prior to the requested installation date for permanent service. Longer lead times may be required for large projects, or if dictated by longer transformer manufacturing delivery schedules. Location of the permanent service entrance will be designated by the PMLP. The information must be as accurate as possible as it will be used for determining the amount of deposit required as well as for the sizing of the electrical equipment. See the *Information & Specifications for Electric Service Installations Handbook* for more information.
